

Beam Lines and Instrumentation 4 – ‘BLIN4’

We thank you not coming and for your remote participation.

- please be sure that we have a copy of your final presented slides with posting permission today (if you have not already done so)
- we appreciate your accommodating this remote meeting arrangement (we had hoped to have this topical event for a long time but we didn't imagine the circumstances under which we would be doing it)
- checkout our webpage, <https://www.alpa.physik.uni-muenchen.de/> which provides links, in a single chart, to the three important topical meeting series that highlight and document global progress with laser-driven energetic particle and photon sources, particle acceleration and particle accelerators:

Targ-N, BLIN-N and ALPA-N

- we will contact you in 2022 about BLIN5

Katia, Joerg and Paul at LMU
